

Medina Varsity winterguard is pleased to present their 2025 show entitled "Tidal".

Earth. Air. Fire. Water. Nature's elements are known to create truly phenomenal events. Earth creates earthquakes, fire creates the eternal flame, and air creates wind. But what about water? The pull from the moon and natural events disrupt the typically serene element, and the powerful tidal wave is created. Towering hundreds of feet from the ocean's surface with a deafening roar, the tidal wave is truly a force to be feared.

The Medina Varsity Winterguard is led by director Melissa Jaeger, with instruction from drill designer Kara Brown, instructors Katie Crooks and Kaela Grosslinger, and Marching Band Director Mr. Jaeger. Consultants include Jimmy Steele and Molly Beth Jaeger. The group would like to thank the Band Boosters and student volunteers for their continued help with the floor, props, chaperoning, and uniforms.
