

Now in its second year of competition under the direction of Amanda Punaro with assistants, Derek Punaro and Stephen Stutzman, Springville-Griffith Institute is proud to present its 2025 production, "Caught in Our Web." Featuring talented performers from grades 6 through 12 on rifles and silks, we are thrilled to have you come along as spiders weave their webs to catch the bugs who dare enter their lair! Thank you to our families for getting our performers to practice, the support of the Springville school district, and everyone in NECGC for your continued support as our program continues to grow.
